

# History of Kenmount Hill

*From its perch at the top of the City of Mount Pearl, Kenmount Park has been an integral part of the community since the early 1980s. Today Kenmount Park has grown to welcome over 2,500 residents in almost 1,000 homes. With over 170 acres, Kenmount Park boasts a community centre, community gardens, formal park, and multiple playgrounds. With over 60 acres of undeveloped space, Kenmount Hill is an key part of the City of Mount Pearl’s vision for growth.*

*The proposed Kenmount Hill Development promises to build on the authentic community vibe with more places to live, work, and play in Mount Pearl. Through an abundance of open space, the addition of walking trails and a second playground, and a mix of commercial and residential properties, we invite you to explore the proposed Kenmount Hill Development. We look forward to your feedback.*
