

MUNICIPAL SERVICES IN MOUNT PEARL

WASTE MANAGEMENT

Mount Pearl takes waste management very seriously. We are one of the few communities in the area that offer weekly recycling collections. We also have implemented a mandatory clear garbage bag program, and have created programs that encourage organic waste diversion, among other initiatives.

SNOW CLEARING

Mount Pearl takes snow clearing seriously with a top-notch fleet of street vehicles. We offer a snow plow tracker and even maintain groomed winter trails. Given Newfoundland's heavy snowfall, we have strict clearing regulations and emphasize the importance of winter safety.

GOING GREEN

Mount Pearl is investing in climate action initiatives, demonstrating its commitment to combating climate change and promoting a clean economy, all with the desire for cleaner air and water for future generations.

OVERVIEW

Mount Pearl sets the standard for municipal excellence. We pride ourselves on top-notch services, from efficient waste management to innovative climate solutions, we are committed to sustainability and aspiring to lead in green initiatives.

WATER QUALITY

The City of Mount Pearl has implemented numerous water programs, including a water quality program. As part of this program, we conduct weekly testing of drinking water from various areas across Mount Pearl. The samples are then sent to the provincial public health laboratory for further testing. Additionally, we perform daily sampling to check disinfection residuals within the distribution system.

ROAD SAFETY

There's no need for speed in the City of Mount Pearl. We have many residential neighbourhoods, over 60 km of walking trails, over 50 playgrounds and play courts, and eight schools. Our goal is to keep our neighbourhoods safe and enjoyable for everyone – pedestrians, cyclists, and drivers.
